

## Case Study: UK Pension Industry Presentation

**Event:** 3 days of Presentations to Members of the Pension Industry

**Budget:** £2700 + VAT

**Audience Size:** 60-70 People Attending

**Venue:** Stanbrook Abbey

Our client requires a large professional **86" LED monitor** and appropriate staging to be set up for specific times at various locations in the UK, we provide a very discrete installation and derig service for a discerning client as the LED screen and staging we provide is integrated into their own event provider's equipment each time.

The 86" LED monitor we provide for this client is from our own large range of varying sized LED screens. This screen comes with its own electrically driven stand to raise or lower the screen to the correct height.

The tilt angle of the screen is manually set at the time of installation, for this particular client we also provide all the inter-connection cabling to complete the integration of the LED screen with the client's event provider's own presentation equipment.

We have done this many times over the past 4 years, so it is a well-oiled operation enabling us to be in and out of the venue within 30/45 minutes each time.
